***REASONS FOR ALLOWANCE***

1. Claims 1, 2, 4, 6, and 7 are allowed over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

The invention as claimed, specifically in combination with an autofocus method having an image sensor producing pixel signals, wherein, on the basis of the pixel that is closest to the optical axis, the local signal amplitude is calculated from the monotonically decreasing or increasing signal to the next local maximum and minimum, focusing a focusing member in large increments while the local signal amplitude is considerably smaller than the maximum signal, at a certain magnitude of the local signal amplitude in relation to the maximum signal, forming cross correlation functions (CCF) from several pixels and from suitable comparison structures, and at a certain ratio of the reference function formed on the basis of the CCF to the local signal amplitude, selecting an increment range comparable to the optical depth of field, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
